SELLING:

69 YEARLING BULLS • 19 OPEN HEIFERS

Welcome to the

Ellingson Simmentals 21st Anniversary Performance Bull and Female Sale

Dear friends,

First of all, it is my pleasure to welcome you to our 21st annual production sale. Since our first purchase of Simmental genetics in 1990, it has been our goal to raise the highest performance cattle possible, seeking genetics from across the country to provide you with the best possible. Our sale will again be held in the Ellingson Event Center at the farm south of Dahlen, ND with DVAuction providing online bidding to provide you with the option of buying from home. We will have the animals available for you to view the morning of the sale, but understand with the Covid situation in our world that you may choose to purchase online. We will practice social distancing and do everything we can to keep our customers safe. We would like to thank our previous customers and new buyers for your interest in finding the best performance genetics in the business!

The quality of the genetics offered is the best from top to bottom that we have ever offered. Almost all lots are sired by AI sired proven bulls that provides us with the most reliability and predictability in the industry. Our entire female base has been on ASA's Cow Herd Roundup, giving us more reliable EPD's along with tracking polled and color status. We have also been awarded the Performance Advocate award by ASA which involves taking performance weights and ultrasound evaluation on the entire calf crop. All of this genetic evaluation not only helps us track our progress, but gives you more reliability in the performance genetics that you are purchasing. We have utilized embryo transfer now for several years and brought in some donor cows with Strommens to provide you with a broader base of genetics to choose from.

We probably had one of the most amazing crop and pasture years on record. We were blessed with rainfall almost every week until it finally shut off in August, and has been very dry ever since. Our crop yields were very good and the pastures were very lush, which may have limited some of the calves performance due to too much water in the grass. Even through all of this, the calves came home in great shape on September 23 and have been doing very well. The embryo calves starting with H1036 came home in early November, and without creep feed it makes them a bit hard to compare with our older bulls that had creep feed, and we have not had enough time since weaning on them to get comparable data with the rest.

The bulls have been fed a TMR rations since weaning, feeding seven pounds of corn, one pound supplement, twenty pounds corn silage, six pounds of chopped alfalfa, and free choice grass hay to ensure adequate growth, building muscle and not fat and insuring longevity in your bull purchase. The average daily gain data was calculated from 80 day feeding since weaning.

We will ultrasound all bulls and heifers before the sale for rib eye size, marbling and backfat. The bulls will be fertility tested with scrotal measurements taken. If there is any DNA data that comes in after the sale catalog is published we will have that on our web site ellingsonsimmentals.com, along with videos of the animals. The catalog and videos will also be on DVAuction web site for your viewing. Be sure to register early with DVAuction if you are interested in viewing and bidding with this method.

We once again welcome Strommen Simmentals from Arthur as a guest consignor, he is bringing a stout set of bulls this year.

We invite your inspection of our herd before the sale and welcome you to a meal starting at 11am in the Ellingson Event Center. If you cannot make it to the sale and prefer not to bid on the internet, we will have phone service available, please contact myself or my herdsman Bryan Haugen ahead of time so we can have someone on the phone with you.

The year 2020 will go down in history as one that has touched every human on this planet in one way or another. I trust that we all will get through this and be a better society in the future, but for now we still need to use caution in our gathering and make sure all stay safe. I understand if you wish to stay home and bid, whether on DVAuction or with one of us on the phone, just let us know your wishes.

Once again, we would like to thank you for your support and interest in our breeding program. Let us know if we can be of assistance in your sale selection process or have any further questions. Thanks again, stay safe and God Bless!

**God Bless,
Terry Ellingson**

This homozygous black, homozygous polled son of W/C Bankroll carries the Red Charlie gene. What that means is you need to treat him as a heterozygous black bull as he can sire a red calf. This doesn't affect the quality of the animal, only the color calves he will sire. This bull is as pretty as a picture, has the combination of calving ease, carcass and great performance, what a herd sire he will make!

25 ELLINGSON BANKROLL H58 ASA# (3772356)

A dark red, dilution free, homozygous polled son of Rust Rio Grande, who is sired by WFL Westcott and his dam is RF Certainly Flirtin 202Z. H1009's dam is by Captain Morgan and granddam by 680S, he combines some famous pedigrees in the Simmental breed. He has the seventh high adjusted 205 day weaning weight in the pen, fifth highest ADG, third highest WDA, sixth highest weaning EPD and fourth highest yearling weight EPD.

This dark red, dilution free, homozygous polled son of CDI Perspective has calving ease potential with superior growth numbers. If you combine his performance and carcass numbers, he really will provide a well rounded calf crop. His dam is a Red Summit out of Red Jewel so a deep pedigree. He had the fifth highest adjusted 205 day weight and ninth highest adjusted yearling weight of the group.

This half blood homozygous black, homozygous polled son of G A R Prophet offers a great combination of high growth and unmatched carcass potential. Prophet is the only bull in the Angus breed with his levels of CED, high growth and top 1% marbling, WW and YW. His stylish daughters are known for their docility and udder quality. A unique opportunity in a percentage bull!! He was also tenth in ADG and eighth highest WDA in the pen.

Hugo is our largest framed bull in the sale and will be sure to add pounds to your calf crop. The thing that keeps me looking at this calf is his thickness, mass and the way he handles himself on the move. He is a performance bull with the growth numbers to back it up. Tested Homozygous Black and Homozygous Polled.

Hamlin is a deep sided red calf with a world of performance. Width, muscle and masculinity come to mind when you examine him. This bull has a solid set of EPD's and growth numbers to put some pounds into his calf crop. He will add some heterosis being a 3/4 blood going back to a half blood cow that we purchased from Ahlberg Cattle in Nebraska. Tested Homozygous Polled and Non-Diluter.

We brought out the popular Nichols Legacy G151 semen for this mating, came up with this fancy black homozygous polled heifer. Legacy made his mark with his exceptional calving ease which we saw here, 69 pound adjusted birth weight is super low in our herd. Legacy's daughters have low birth weight, adequate performance and excellent carcass traits. Build yourself a true calving ease line in your herd!

Wow, look at the numbers on this girl! H98 is a homozygous black, homozygous polled daughter of Growth Fund, who sires proven calving ease with off the charts growth and end product values, he ranks in the top 1% for YW, CW and \$B. With Wallbanger and 680S on the dam side, her numbers are solid! Her offspring will put you on the map in a hurry!

H1022 is black and homozygous polled, sired by a son of Preferred Beef and whose dam has been the mother of many of our top selling bulls in previous sales. She may not be sired by AI, but genetically she is as good as any heifer in the pen. If you want to raise the fancy ones that can perform, this heifer is for you!

We are located halfway between Grand Forks and Devils Lake. If you are coming from the east on Highway 2, turn north ten miles on Highway 32, turn west on GF County #1 three miles, turn south on Nelson County #14 one quarter mile (gravel) and west one half mile. From the west on Highway 2, turn north at Michigan on #35, go nine miles north to Nelson County #1, go nine miles east to Nelson County #14 (gravel), turn south one quarter mile, then one half mile west. Please note: Some GPS systems take you north of Dahlen to get to our address, be sure to turn south of Dahlen to get to the farm. We are the first farm south of Dahlen.
