SELLING:

59 YEARLING BULLS • 30 OPEN HEIFERS

Welcome to the

Ellingson Simmentals 22nd Anniversary Performance Bull and Female Sale

Dear friends,

It is my pleasure to welcome you to the 22nd annual production sale and I would like to thank-you for your interest and support since we began in 1990. Our goal in 1990 was to raise Simmentals with high performance that we didn't have to use a jack to crank them out when they were born, and had enough vigor to get up in the nastiest North Dakota winter in January and find its first meal, would gain like crazy and make their owners happy when they took them to the sale barn.

Some things don't change, we still like cattle that perform, are easy doing and easy to look at and will have enough carcass characteristics to make the grade when they find their final destination. In order to make this happen, we use extensive artificial insemination and embryo transfer in our herd, you will see the sale selections have generations of proven AI bulls behind them. We also continually seek out new genetics to compliment what genetic base we have and improve on it. We were fortunate to purchase the US semen rights on R Plus Yuma 9087G, who was the high selling bull in the R Plus spring sale in 2020 at \$150,000, selling to LaBatte Simmentals and Circle 7 Ranch. He is homo polled, hetero black, which will provide us with some unique outcross red and black genetics. We also will have calves in 2022 from a donor cow that we feel is pretty special. We flushed her as a bred heifer, and after calving in October we did IVF on her again, resulting in a flush of 38 freezeable embryos, which is awesome fertility.

I would rather not discuss the summer of 2021 as most of you in the area experienced the same drought conditions as we did, never thought I would be hauling water to cows on pasture, along with digging a well and utilizing rural water so there weren't quite so many pastures to haul water to. Because of the short grass supply and drying up water holes, we decided to wean the calves on August 23, and I was sure pleased with the weights even under extreme heat, wind and dry conditions. We did get some rains in September that greened up things and allowed the cows to stay out on pasture, but not enough where I could quit hauling water. One advantage of winter is they are home and can use the water fountains!

The bulls have been fed a TMR since weaning, bringing them up to seven pounds of corn/distillers grain and one pound of supplement, twenty pounds of corn silage, ten pounds of chopped alfalfa and free choice grass hay. We strive to put muscle, not fat on our bulls which will insure longevity in your purchases. The average daily gain (ADG) was calculated on a 100 day feeding period.

The sale offerings are the best I have offered from top to bottom, with generations of AI breeding. The entire calf crop was DNA tested using the GGP-LD Genomic test, the American Simmentals Calf Crop Genomics program, which gives you genomically-enhanced EPDs for selection decisions. This is like having EPD from the animal that would include 25 progeny for calving ease, weaning weight and yearling weight, and 22 birth weight measurements, obviously improving the accuracy of the EPD you are selecting for. This also gives parentage verification and we tested all animals that needed homozygous color or polled testing. Our cow herd has also been through the Cow Herd DNA Roundup to verify parentage and improve accuracy. We have always participated in the ASA Total Herd Enrollment program which also improves data accuracy, and we have been awarded the Performance Advocate award from ASA in the past.

All bulls and heifers have had ultrasound measurements taken for rib eye size, marbling and backfat, and that data will be available on line and at the sale. The bulls will be fertility tested with scrotal measurements taken. This information will also be available on line, either on ellingsonsimmentals.com or DVAuction.com, along with the catalog and videos of each individual lots. Be sure to register early with DVAuction if you are interested in viewing and bidding with this method.

We invite your inspection of our herd before the sale and will have a meal around 11 am in the Ellingson Event Center. If you cannot make it to the sale and prefer not to bid on the internet, we will have phone service available, please contact myself or my herdsman Bryan Haugen ahead of time so we can have someone on the phone with you.

Once again, I would like to thank you for your support and interest in our breeding program. Let us know if we can be of assistance in your sale selection process or have any further questions. Thanks again, stay safe and God Bless.

**God Bless,
Terry Ellingson**

We are located halfway between Grand Forks and Devils Lake. If you are coming from the east on Highway 2, turn north ten miles on Highway 32, turn west on GF County #1 three miles, turn south on Nelson County #14 one quarter mile (gravel) and west one half mile. From the west on Highway 2, turn north at Michigan on #35, go nine miles north to Nelson County #1, go nine miles east to Nelson County #14 (gravel), turn south one quarter mile, then one half mile west. Please note: Some GPS systems take you north of Dahlen to get to our address, be sure to turn south of Dahlen to get to the farm. We are the first farm south of Dahlen.
