SELLING:

66 YEARLING BULLS • 24 OPEN HEIFERS

Welcome to the

Ellingson Simmentals 24th Anniversary Performance Bull and Female Sale

Dear friends,

It is my pleasure to welcome you to our 24th annual production sale. I would like to thank you for your interest and support since we began breeding Simmentals in 1990. Our goal then was to raise Simmentals with high performance and eye appeal. As time has evolved, we are also focusing on calving ease and high carcass traits, but we continue to strive to raise the best genetics possible to help you raise the bar in your own program also. Because of your needs, we have brought in some new genetics to diversify my original goals and meet all of your requests.

The original purchase of the US semen rights for R Plus Yuma 9087G after he sold to LaBatte Simmentals and Circle 7 Ranch for \$150,000 has turned out to be just what I had hoped for. His offspring are very consistent in their performance and structure, he is not a heifer bull but they are extremely long which makes his birth weights a bit deceiving, he just plain calves easily. In fact, when the first calves were born in Canada they thought they may be just too small, but they get up and go and grow. He was the second highest registered Simmental bull in Canada last year. Because of how well we liked his first calf crop, when R Plus Simmentals dispersed their herd last December we had the opportunity to purchase his mother and now she is in our transplant program. Her first calves will be in our 25th Anniversary sale.

Because I felt at my stage of breeding Simmentals I may not be able to make the ideal quickly, I decided to look outside of the box, and found what I was looking for in a donor cow. HHS Simmentals allowed Strommen Simmentals and myself to purchase a share in HHS Georgia 802G as she checked all the boxes I was looking for in a donor cow. She has averaged over 20 frozen embryos per flush in IVF, her progeny were well received last year and we will be selling two full sibs and 12 sons in this years sale. The unfortunate thing with this years calves is the recipient herd they were in ended up being less than ideal for showing their genetic potential, so the weights we expected were not there, but if you look at their EPD's and because of genomic testing we know what their true value will be.

Our extremely long winter with abundant moisture turned into a very dry summer with less than ideal pasture conditions. We weaned the calves on September 11 and put them on a ration with 48 Neg, the maximum grain given for the bulls was 8 pounds of corn and distillers with vitamin/mineral supplement, a TMR ration with corn silage, chopped alfalfa and grass hay. Our goal is to have our bulls look similar in the fall when you take them out as when you put them in with the cows in the spring, we build muscle, not fat, to insure longevity in your herd sire. We tried to average about three pounds average daily gain in the bull calves.

The entire calf crop is on the American Simmental Association Calf Crop Genomics program, with DNA tested using the GGP-LD Genomics test, which gives us genomically enhanced EPD's for selection decisions. The resulting EPD's are similar to an animal that has 25 progeny for calving ease, weaning weight and yearling weight and 22 birth weight measurements, improving the accuracy of the EPD you are looking for. This also tells us if they are homozygous or heterozygous for color, dilution and polled gene. Our cow herd went through the Cow DNA Roundup program to verify parentage and improve accuracy. We also participate in the ASA Total Herd Enrollment program which improves accuracy. In the past we have been awarded the Performance Advocate award for making these measurements.

All bulls and heifers will have had ultrasound measurements taken for rib eye size, marbling and backfat, and this date will be available on line and at the sale when the results return. The bulls will be semen tested with scrotal measurements. You will find this information at ellingsonsimmentals.com or DVAuction.com which will also have the catalog on line with the individual videos. Be sure to register with DVAuction early if you are interested in viewing and bidding with this method.

We invite your inspection of our herd before the sale and welcome you on sale day with a meal starting around 11 am at the Ellingson Event Center. If you cannot make it to the sale and prefer not to bid on the internet, we will have phone service available, please contact myself, Bryan Strommen or my herdsman Bryan Haugen ahead of time so we can have someone on the phone with you.

Once again, we thank you for your support and interest in our breeding program. Let us know if we can be of assistance in your sale selection process or if you have any further questions. Thanks again and God Bless. **Terry Ellingson**

Sale Schedule

January 1 – 27 View cattle at the farm or on video

January 27

11:00 am - Lunch at the Ellingson Event Center

1:00 pm - Performance Bull and Female Sale.

Terms of Sale

All sales are cash on day of sale.

Conditions of Sale

All animals are sold in accordance with guidelines of the American Simmental Association. Copies are available at the sale.

Volume Discounts

Purchase 3 bulls-3% discount, four bulls 4% discount, five or more bulls 5% discount. No discount on heifers.

Health Comments

Ellingson – Birth-Bovilis Nasalgen 3, Alpha 7, Bovilus Coronavirus ; Pasture-Bovishield Gold One Shot, Bovilus Vision 7 Somnus; Weaning-Bovishield Gold One Shot, Bovilus Vision 7 Somnus, Clean- Up II, Valbazen wormer; Booster- Express 5- HS, Nuplura PH, Heifers Bangs Vaccinated; Herd is participating in ND Voluntary Johne's Disease Status program, Status negative level A

Announcements

Announcements on sale day take precedence over printed material.

Insurance

Insurance will be available sale day.

Risk

All animals are at purchaser's risk after sold. Anyone attending this sale attends at his or her own risk.

Guarantee

Bulls are guaranteed to have passed a semen test and are guaranteed for one breeding season.

Trucking

Haul your bulls home sale day and receive a \$100 per head discount. Free delivery within North Dakota or 250 mile radius if delivered by April 15. Bull delivery begins April 1. No discount on heifers, please make arrangements to haul heifers and cows to your ranch soon after the sale.

Registration Papers

Papers will be provided to purchaser after the sale.

Feeding

We will feed your bulls for \$3.00/day beginning April 1. We are not responsible for accidents to your bull during this time. We recommend taking insurance, please see Jeff Thomas.

Semen Interest

We reserve one third revenue sharing semen interest in all bulls. We reserve the right to collect 100 units of semen for in herd use at your convenience and our expense.

Canadian Buyers – We will guarantee cattle pass health requirements and will deliver your purchases to border crossings in ND. All export fees need to be paid by buyer for purchases under \$2,500.

Motels

Alexander House, Park River, ND 701-284-7141

Sunlac Inn Hotel, Lakota, ND 701-247-2487

Motels to east in Grand Forks and to west in Devils Lake.

MM:	20.4	API:	170
MWW:	61.2	TI:	93

Georgia is owned with HHS Simmentals and Strommen Simmentals. I decided it was easier to find a cow that checked all the boxes I was looking for than to breed her. When you look across her EPD profile I think you will agree she is something special. She has averaged over 20 frozen embryos in IVF and with extremely good embryo conception. Fertility is highly heritable, we need an EPD for it but tough to measure. Two full sibs sell, no more semen on her sire so your only chance to buy a full sib

1 ELLINGSON/STR BLACK ICE L3036

ASA# (4241435)

Owned by: ELLINGSON SIMMENTALS • Homo Polled PB Bull

Tattoo: L3036 • Birthdate: 2/3/23 • Act. BW: 92 lbs. • Adj. BW: 91 lbs

MCE:	8.2	Stay:	17.6
MM:	23.5	API:	163
MWW:	73.5	TI:	100

Black Ice is a full brother to HHS Georgia, out of HHS Entourage and HHS Miss Lucky Ann. He is a heterozygous black and homozygous polled baldy that will catch your eye due to his unique phenotype and excellent performance numbers. L3050 is his full brother in this sale, but there is no more Entourage semen to get, so take a look at what Georgia is doing and imagine what Black Ice can do!

2 ELLINGSON/STR BIG TIME L3050

ASA# (4241449)

Owned by: ELLINGSON SIMMENTALS • Homo Polled PB Bull

MM:	23.5	API:	161
MWW:	65.9	TI:	93

He is a full brother to L3036 and HHS Georgia, our donor dam. He is a heterozygous black, homozygous polled baldy that has a big-time look! He is a paternal brother to LCDR Reserve 210J at Genex and LCDR Anthem 33K and LCDR Patriot 8K. Since there is no Entourage semen left to get, these genetics are priceless! He is in the top 4% API and 2% TI in the breed.

3 ELLINGSON/STR SUMMIT L3053

ASA# (4241452)

Owned by: ELLINGSON SIMMENTALS • Homo Polled PB Bull

MM:	27.8	API:	182
MWW:	77.9	TI:	110

His name says it all, Top Shelf is going to be on your short list as this heterozygous black, homozygous polled son of Guardian and our donor Georgia checks all the boxes. He is in the top 1% of the breed for TI at 110 and marbling at .8 along with the top 2% for API at 182, weaning weight at 101 and CW at 54. He is also in the top 3% for yearling weight at 155 and MWW at 78. Did I talk about his perfect structure!

Yuma was the high seller at the 2020 R Plus sale at \$150,000, purchased by LaBatte Simmentals and Oberle Bros. We later purchased the US semen rights. Yuma was the second highest registered sire in Canada last year. He sires tremendous length, power, and docility with great weaning and yearling EPD's. His full sib red sister sold for \$130,000 at the R Plus dispersion in December of 2022, where we also purchased his dam.

ELLINGSON YUMA L318

This Yuma son is homozygous polled and heterozygous black, and out of a fancy Riddler dam, that cross really seems to work well! If you are selling calves by the pound, it doesn't hurt to buy bulls with 93 WW and 152 YW EPD to help keep you in the business, just a fancy bull to bring home!

Yuma does it again, a homozygous polled, heterozygous black son, I don't mind the red gene, I actually like it, but some of you like them homozygous black. If they are good enough and your cows are mainly homozygous black, you need to take a look! He is a younger calf and has loads of potential, I think his calves' performance will impress you! Again, with Riddler and 680S on the dam side, the outcome is very predictable!

MM:	29.8	API:	161
MWW:	76.5	TI:	97

L384 is homozygous polled and homozygous black and sired by the great CLRS Guardian 317G, whose EPD's for API, TI, MB and MWW are in the top 1% of the breed, top 2% for WW and top 3% for YW, Milk, CW and Stay. It doesn't hurt that his dam is by Cowboy Cut out of a super 680S dam. With a 161 API and 97 TI, he puts it all together in one package, and he is also easy to look at!

ELLINGSON BEACON L3027

A dark cherry red heterozygous polled son of Net Income, his dam goes back to 90 Proof and Beefmaker, some tremendous bulls on the red Simmental side! He has the fourth highest Adj. 205 day weaning weight at 834 pounds, the ninth highest adj YW at 1450 pounds and the third highest WDA of 4.01 pounds per day. He is super long with a wide top and full deep quarter, should be fun to sell his calves!

A rare homozygous black, homozygous polled daughter of Yuma, who hurt his leg and is no longer with us. Take advantage of buying these Yuma daughters, not sure how many down the road we will part with as semen is limited. You have to appreciate her correctness and depth, along with her high performance EPD's.

A homozygous polled cherry red baldy heifer out of our herd bull sired by IPU Bentley 81F. Her mother is my most favorite 680S W962 daughter! No wonder she has such a show ring type profile with a solid set of EPD's. Buy with confidence, an amazing combination of great genetics!

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Average Daily Gain (ADG): Pounds of post-weaning daily weight gain.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Docility (DOC): Percent of offspring achieving a docile (1) score.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF):

Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters

remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

R Plus Yuma 9087G

Miss R Plus 3007A – Dam of Yuma

We are located halfway between Grand Forks and Devils Lake. If you are coming from the east on Highway 2, turn north ten miles on Highway 32, turn west on GF County #1 three miles, turn south on Nelson County #14 one quarter mile (gravel) and west one half mile. From the west on Highway 2, turn north at Michigan on #35, go nine miles north to Nelson County #1, go nine miles east to Nelson County #14 (gravel), turn south one quarter mile, then one half mile west.

Please note: Some GPS systems take you north of Dahlen to get to our address, be sure to turn south of Dahlen to get to the farm. We are the first farm south of Dahlen.
